DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- Claims 1-8, drawn to a method of manufacturing a low expansion material, classified in class 75, subclass 330.
- II. Claims 9-10, drawn to a semiconductor device, classified in class 257, subclass 741.
- III. Claims 11-12, drawn to a semiconductor device with a semiconductor element mounted directly to a heat sink, classified in class 257, subclass 707.
- IV. Claims 13-14, drawn to a semiconductor device with a heat releasing plate, classified in class 257, subclass 712.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and (II-IV) are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the process as claimed can be used to make other and materially different products. This is evidenced in the fact that only a process of making a material is claimed, this material in turn is incorporated into several

patentably distinct inventions (II-IV) which in themselves require a separate status in the art as described above.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

A telephone call was made to Steven Meyer on 4/19/05 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Douglas M. Menz whose telephone number is 571-272-1877. The examiner can normally be reached on M-F 8-5.
